

Remnant Preserving Posterior Cruciate Ligament Reconstruction

remnant-preserving posterior cruciate ligament ... - remnant-preserving posterior cruciate ligament reconstruction: arthroscopic transseptal, rod and pulley technique bancha chernchujit, m.d., supawat samart, m.d., and pongtep na nakorn, m.d. abstract: the preservation of posterior cruciate ligament (pcl) remnant augmentation was recently proposed as a technique for pcl reconstruction.

clinical comparison of conventional and remnant-preserving ... - remnant-preserving technique will be superior to the conventional technique in which all pcl fibers are removed. ... the reamer was rotated counterclockwise to preserve as much of the posterior cruciate ligament (pcl) remnant as possible and to allow for socket positioning in the intended location. **remnant preservation is helpful to obtain good clinical ...** - clinical results in posterior cruciate ligament reconstruction: comparison of clinical results of three techniques ... a remnant pcl-preserving stent (antero-lateral bundle [alb] reconstruction) procedure with the ... posterior to the pcl remnant and then it was pushed until **remnant-preserving anterior cruciate ligament ...** - remnant-preserving anterior cruciate ligament reconstruction using a three-dimensional fluoroscopic navigation system shuji taketomi, md 1, hiroshi inui, md , ... when the remnant tissue of acl was scarred to the posterior cruciate ligament (pcl) or reattached to either the roof of the notch or the lateral wall, the minimal amount of the ... **arthroscopic posterior cruciate ligament reconstruction ...** - arthroscopic posterior cruciate ligament reconstruction with remnant preservation using a ... disrupting the remnant posterior cruciate ligament. fig 3. the hook of the posterior cruciate ligament (pcl) tibial guide is introduced over the remnant pcl bundles (a) and is ... at a mean of 11 months after remnant-preserving pcl **a new behind-remnant approach for remnant-preserving ...** - double bundle anterior cruciate ligament reconstruction ... 200 remnant-preserving db acl reconstructions using ... posterior border of the direct insertion of the remnant tissue with about a 5-mm margin from the articular surface distally and posteriorly (fig. 1). ... **research open access double bundle arthroscopic anterior ...** - double bundle arthroscopic anterior cruciate ligament reconstruction with remnant preserving ... because it is located posterior to the anteromedial (am) bundle insertion. therefore making a longitudinal slit in ... cruciate ligament reconstruction with remnant preserving technique ... **behind-remnant approach for anatomic anterior cruciate ...** - remnant-preserving double-bundle (db) anterior cruciate ligament (acl) reconstruction, was introduced. in this technique, femoral tunnels are created based on the arthroscopic observation from behind the acl remnant, using the remnant fold at the acl femoral attachment and posterior cartilage margin as
